11 A stitch in time … by Kosrow Dehnad, Columbia University and the Samba Financial Group 210
List of figures and tables

2 A best practices framework for operational infrastructure and controls in asset management
Typical structure of an asset management organisation, 24
Investment management process functions, 38

3 Managing costs at investment management firms
Investment management value chain and standardised processes, 49
Investment management costs by strategy (in basis points), 52
Investment management costs by function (in basis points), 53
Sustainable cost reduction, 57

4 Lean Six Sigma in asset management: a way to cut costs?
Comparing Japanese and American automobile manufacturers, 64
Comparing craft, mass production and Lean thinking, 68
The five key elements in Lean, 68
Definition of asset management, 77
Key specialities for asset management compared to automobile manufacturing, 80
Simplified value map for an asset manager, 82
Simplified swim lane diagram for asset manager operations, 84

5 Management of risk, technology and costs in a multi-line asset management business
Expenses budgeted by CFO or line manager, 101
Questions that suggest a Wall-Street-style, centralised management model, 103

6 Strategic and tactical cost management in the asset management industry
Economic crisis impact on the fundamentals of the asset management industry, 113
Operating profits of European asset managers (in basis points), 113
Asset managers that publicly announced workforce layoffs (as % of current workforce), 115
Breakdown of asset managers’ expenses, 115
Examples of cost cutting in non-compensation costs in three major firms (in $ million), 116
Breakdown of non-compensation expenses (NCE), 117
Cost-cutting activities, 117
Most common types of cost-cutting programmes, 118
Sample of recent large operational risk losses by asset managers, 120
Cost structure for a fund, 124
Cost structure for a fund: reducing processing costs to $4 per transaction, 126
Cost structure for a business unit: reducing the cost of errors, 128

7 Cost effectiveness in the asset management industry: an IT operations perspective
Cost reduction initiatives in a strategic perspective, 135
Simple investment structure in an asset management firm, 138
Cost segmentation in an asset management firm, 140
Maintained benefits from cost-saving programmes, 143
SimCorp StrategyLab (September 2009), ‘Report on Global Investment Management Cost Survey 2009’, responses to the question: “Which of the following cost drivers were/are/will be primary targets for cutting cost in the company you work for?”, 147
Fragmented vs. consolidated data infrastructure, 148

8 Cost structure patterns in the asset management industry
Cumulative revenue and SG&A expense growth rates, 158
Indirect expenses as a proportion of total revenue, 159

10 Does strategic outsourcing create financial value?
Reasons behind outsourcing failure, 195
Reasons behind outsourcing failure, 195
Number and value of sample contracts across time, 201
Outsourcing value by contract type across time, 202
Model of choice of contractual structure, 204
Model of buy-and-hold abnormal returns (BHAR), 204
The moderating effect of contract drivers, 205

11 A stitch in time …
A basic model for an asset management operation, 212

Foreword
This book constitutes the second book in a series of three addressing risk, cost and growth in the global asset management industry. As with all activities of SimCorp StrategyLab, the purpose of this book is to aid and improve strategic decision-making processes in the industry. As I see it, all contributors to the making of the book have done their very best in that respect. The outcome of their work represents in my view, true quality. On behalf of SimCorp StrategyLab, I would like to thank them all.

Lars Falkenberg
Assistant Director of SimCorp StrategyLab
