Preface	xi
I Preliminaries	1
1 Mathematics Review	3
1.1 Functions	3
1.2 Exponents and logarithms	4
1.3 Growth rates	6
1.4 Slopes and derivatives	10
1.5 Finding the maximum of a function	12
1.6 Spreadsheets	14
1.7 Getting data from FRED	15
2 Macroeconomic Data	19
2.1 Measuring GDP	20
2.2 Identities	22
2.3 Distinguishing prices from quantities	26
2.4 Fine points	29
II Long-Term Economic Performance	39
3 The Production Function	45
3.1 The production function	45
3.2 Capital input	48
3.3 Labor input	49
3.4 Productivity	51
3.5 Marginal products	52
4 The Solow Model	57
4.1 The model	58

4.2	Capital dynamics	58
4.3	Convergence	60
4.4	Impact of saving and investment	63
4.5	Growth	63
5	Sources of Economic Growth	69
5.1	Cross-country differences in output per worker	69
5.2	Cross-country differences in growth rates	71
5.3	Extensions	73
6	Institutions and Policies	79
6.1	Good institutions	79
6.2	Institutions or policies?	81
7	Labor Markets	87
7.1	Indicators of labor-market “status”	88
7.2	Supply and demand for labor	89
7.3	Supply and demand with a minimum wage	91
7.4	Labor-market institutions	93
7.5	Labor-market flow indicators	93
7.6	Virtues of flexible input markets	94
7.7	A model of unemployment dynamics	96
7.8	Institutions and labor-market dynamics	98
8	Financial Markets	105
8.1	Features of effective financial markets	105
8.2	Financial regulation and crises	106
9	International Trade	109
9.1	Ricardo’s theory of trade	110
9.2	Digging a little deeper	112
9.3	Wages and productivity	116
9.4	Bottom line	117
9.5	Winners and losers	118
III	Short-Term Economic Performance	121
10	Business-Cycle Properties	127
10.1	Cycles and volatility	128
10.2	Expenditure components	129
10.3	Labor and capital markets move with the cycle	130

11 Business-Cycle Indicators	135
11.1 Terminology	136
11.2 Forecasting	136
11.3 Good indicators	137
11.4 Identifying good indicators	138
11.5 The business-cycle scorecard	142
11.6 Regression-based forecasting	145
11.7 Aggregation and prediction markets	146
12 Aggregate Supply and Demand	151
12.1 Aggregate supply	152
12.2 Aggregate demand	154
12.3 Aggregate supply and demand together	155
12.4 Beyond supply and demand	158
13 Policy in the AS/AD model	163
13.1 Objectives of policy	163
13.2 Policy responses to supply and demand shocks	164
14 Money and Inflation	173
14.1 What is money?	174
14.2 The quantity theory of money	174
14.3 Evidence	175
14.4 Hyperinflations	177
14.5 Deflation	179
15 Monetary Policy	183
15.1 Interest rates	184
15.2 Monetary policy: objectives, instruments, and targets	186
15.3 The Fed's Balance Sheet	189
15.4 The Taylor rule	190
15.5 Open market operations	193
15.6 Quantitative easing and forward guidance	195
15.7 Exit from QE: the new normal?	197
IV Crises and Other Topics	203
16 Taxes	207
16.1 Social cost of taxes	208
16.2 The benefits of a broad tax base	210
16.3 Applications	211

17	Government Debt and Deficits	221
17.1	Government revenues, expenses, and debt	222
17.2	Debt and (primary) deficits	222
17.3	Debt dynamics	224
17.4	What's missing?	227
17.5	How much debt is too much?	229
18	International Capital Flows	233
18.1	Trade in goods, services, and income	234
18.2	Trade in assets	235
18.3	Net foreign assets	236
18.4	Sources of external deficits	237
18.5	Debt dynamics and sustainability	238
18.6	Big picture	239
19	Exchange-Rate Fluctuations	243
19.1	Terminology	244
19.2	Properties of exchange rates	245
19.3	Purchasing-power parity	245
19.4	Depreciation and inflation	248
19.5	Interest rate parity and the carry trade	250
19.6	Predicting exchange rates	252
20	Exchange-Rate Regimes	257
20.1	A catalog of foreign-exchange arrangements	257
20.2	Fixed exchange rates	258
20.3	Sterilization	260
20.4	The trilemma	261
20.5	Exchange-rate crises	261
20.6	Strong fixes	262
21	Macroeconomic Crises	265
21.1	Classic crisis triggers	265
21.2	Crisis indicators: the checklist	266
21.3	Crisis responses	268
	Index	276
