

## Internship at TerraCycle

Interns at TerraCycle learn the ins-and-outs of eco-capitalism, recycling and social entrepreneurship, and serve as eco-ambassadors in both a local and global context. We offer internships in over 10 departments.

### **NUTS AND BOLTS:**

While TerraCycle internships are unpaid, they offer many educational components. Our interns are largely comprised of independent students, though graduate students often join us for a summer. The environment is dynamic and highly energized. A benefit of TerraCycle's eco-focus is that some schools (including Princeton University) provide a stipend or course credit for their students to work at TerraCycle. Please check with your school if they can provide support.

The internship is located at our graffiti-covered headquarters in Trenton, NJ. The preferred duration of the internship is 9 – 12 weeks. Interns need to bring their own laptops to the office. We offer a bountiful buffet-style lunch every day (1 free lunch for interns per week with potentially 1 free additional lunch earned through company-wide "green" initiative program) and encourage interns to attend regular company events. Students receive significant executive direction and guidance, including career advice, if requested.

TerraCycle is presently creating a recycling database to give consumers an easy to use, reliable, and globally relevant tool for recycling all products and packaging anywhere in the world. All interns will spend some time assisting and contributing to this exciting project.

Each team (and country) handles internship recruiting independently and as the teams work together closely, we ask that you please let us know if you are applying to multiple department's internships. Interested candidates also have the opportunity to apply for an internship in our international offices in Canada, Mexico (fluency in Spanish required), Brazil (fluency in Portuguese required), UK, Japan, or Australia at their own expense.

All interested applicants should send a cover letter and resume to their department of interest with the subject line "Internship Application": For more info visit the [TC Internship Page](#)
