Warming Up to Neon Colors

**TRICKS OF THE TRADE:**

Tomoko Ogura, Women's Co-op at Barneys New York.

**Ms. Ogura:** Neon high heels aren’t so scary any more. Neon isn’t just for the young. Neon is a very chic color to wear with anything. Look at me—this is my 60s look. If you want to warm up your wardrobe, neon is a great color. If you’re too afraid to wear it, start with accessories: a bag or a belt. You can also layer neon with other colors. It’s a great way to add color to your wardrobe without being too loud.

For women who are afraid of neon, Ms. Ogura suggests wearing neon pants or a neon camisole under a white or black shirt. Neon is a great color for a night out, especially with a neutral color like black or white.

**Mr. Rosen:** Neon is a great color to wear for a night out. It’s a fun color that can dress up any outfit. You can wear neon with anything, but it’s best to keep it simple. Avoid wearing too many different colors at once. Neon is a statement color, so you should let it be the focal point of your outfit.
