Spring 2020 Roundtable Agenda: Climate Disclosure and Firms
Moderated By: April Klein and Edward Rock

In Larry Fink’s 2020 letter to CEOs, the BlackRock CEO wrote that

Given the groundwork we have already laid engaging on disclosure, and the growing investment risks surrounding sustainability, we will be increasingly disposed to vote against management and board directors when companies are not making sufficient progress on sustainability-related disclosures and the business practices and plans underlying them.

Assuming that firms take BlackRock’s threat seriously and provide sustainability-related disclosure, what are the implications for investors and firms? In this conference, we look closely at these issues.
