

Orchestrating the process of building innovation portfolios

Relationship between Portfolio & Firm Performance

Portfolio
Performance

Firm
Performance

What are the key challenges in portfolio management?

Too many projects in portfolio

Poor project selection quality

Missing strategic alignment

Untimely termination of projects

Poor transparency of project information

Missing innovative projects in portfolio

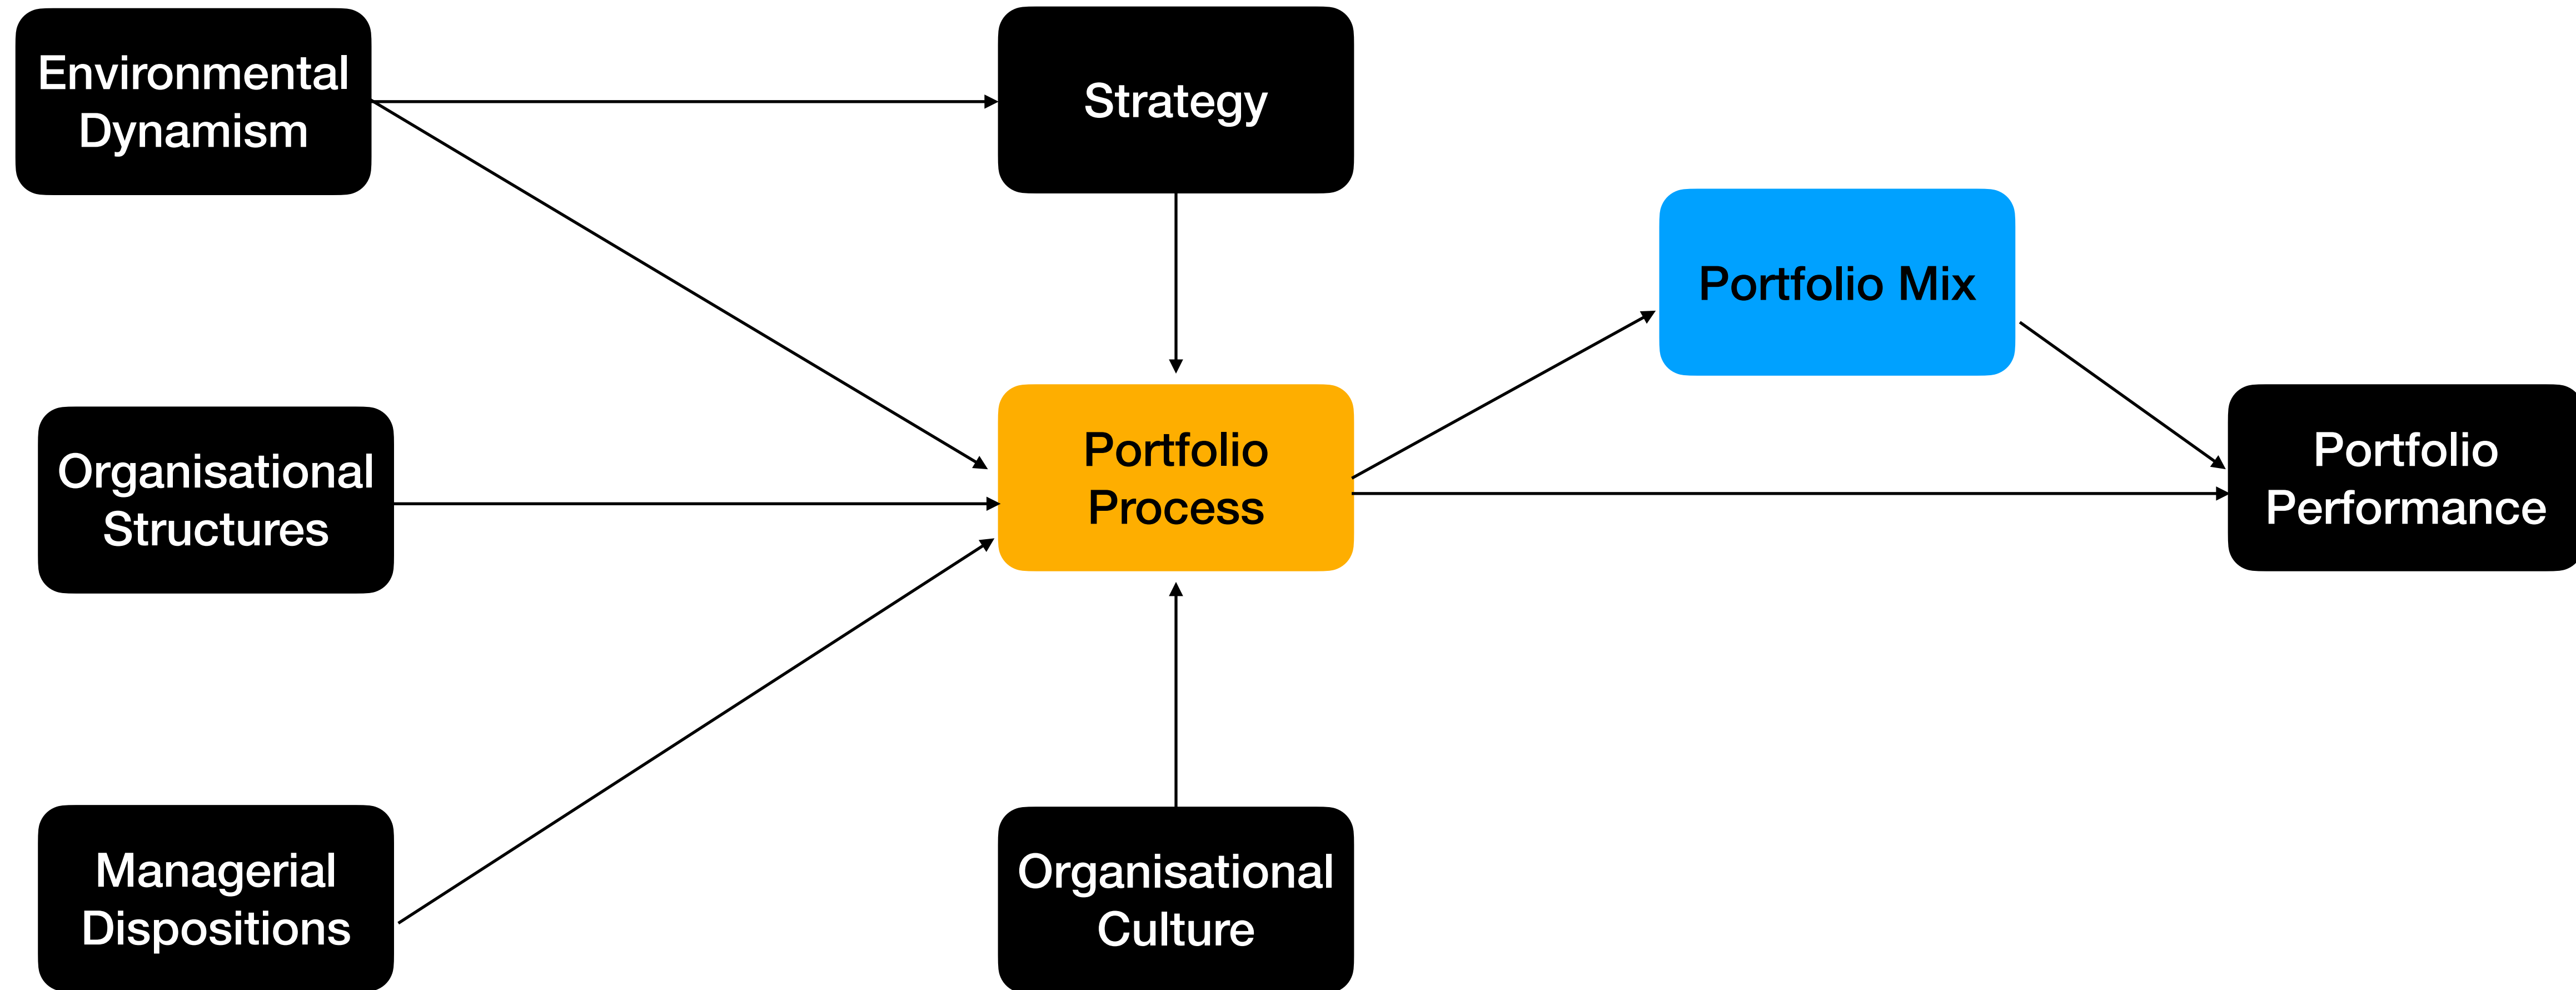

Missing portfolio balance

Too many incremental projects

Delayed project timelines

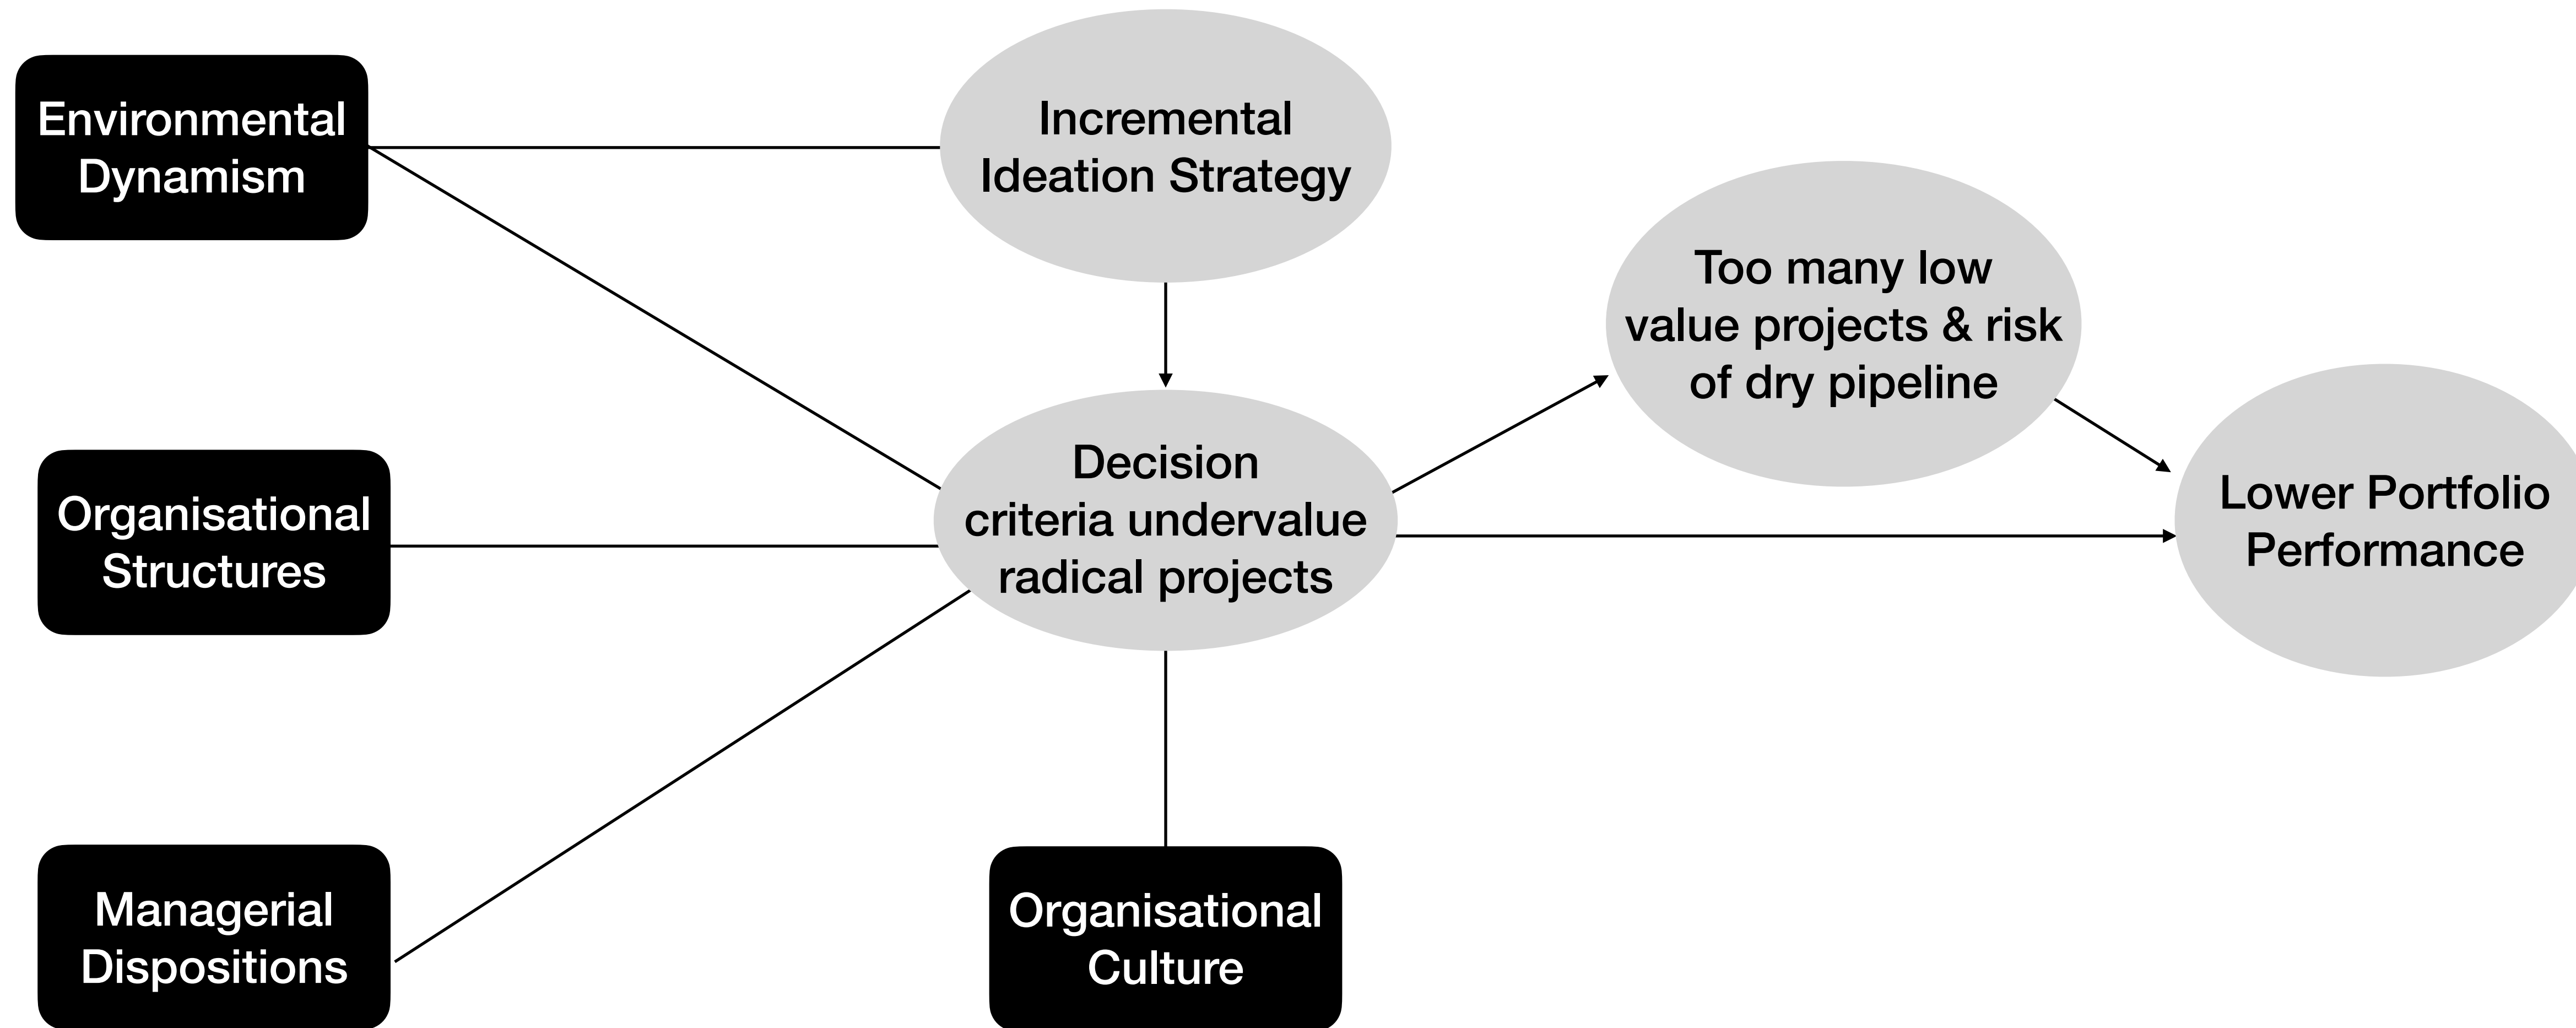

Why do they exist?

because of underlying context that shapes portfolio process and portfolio mix

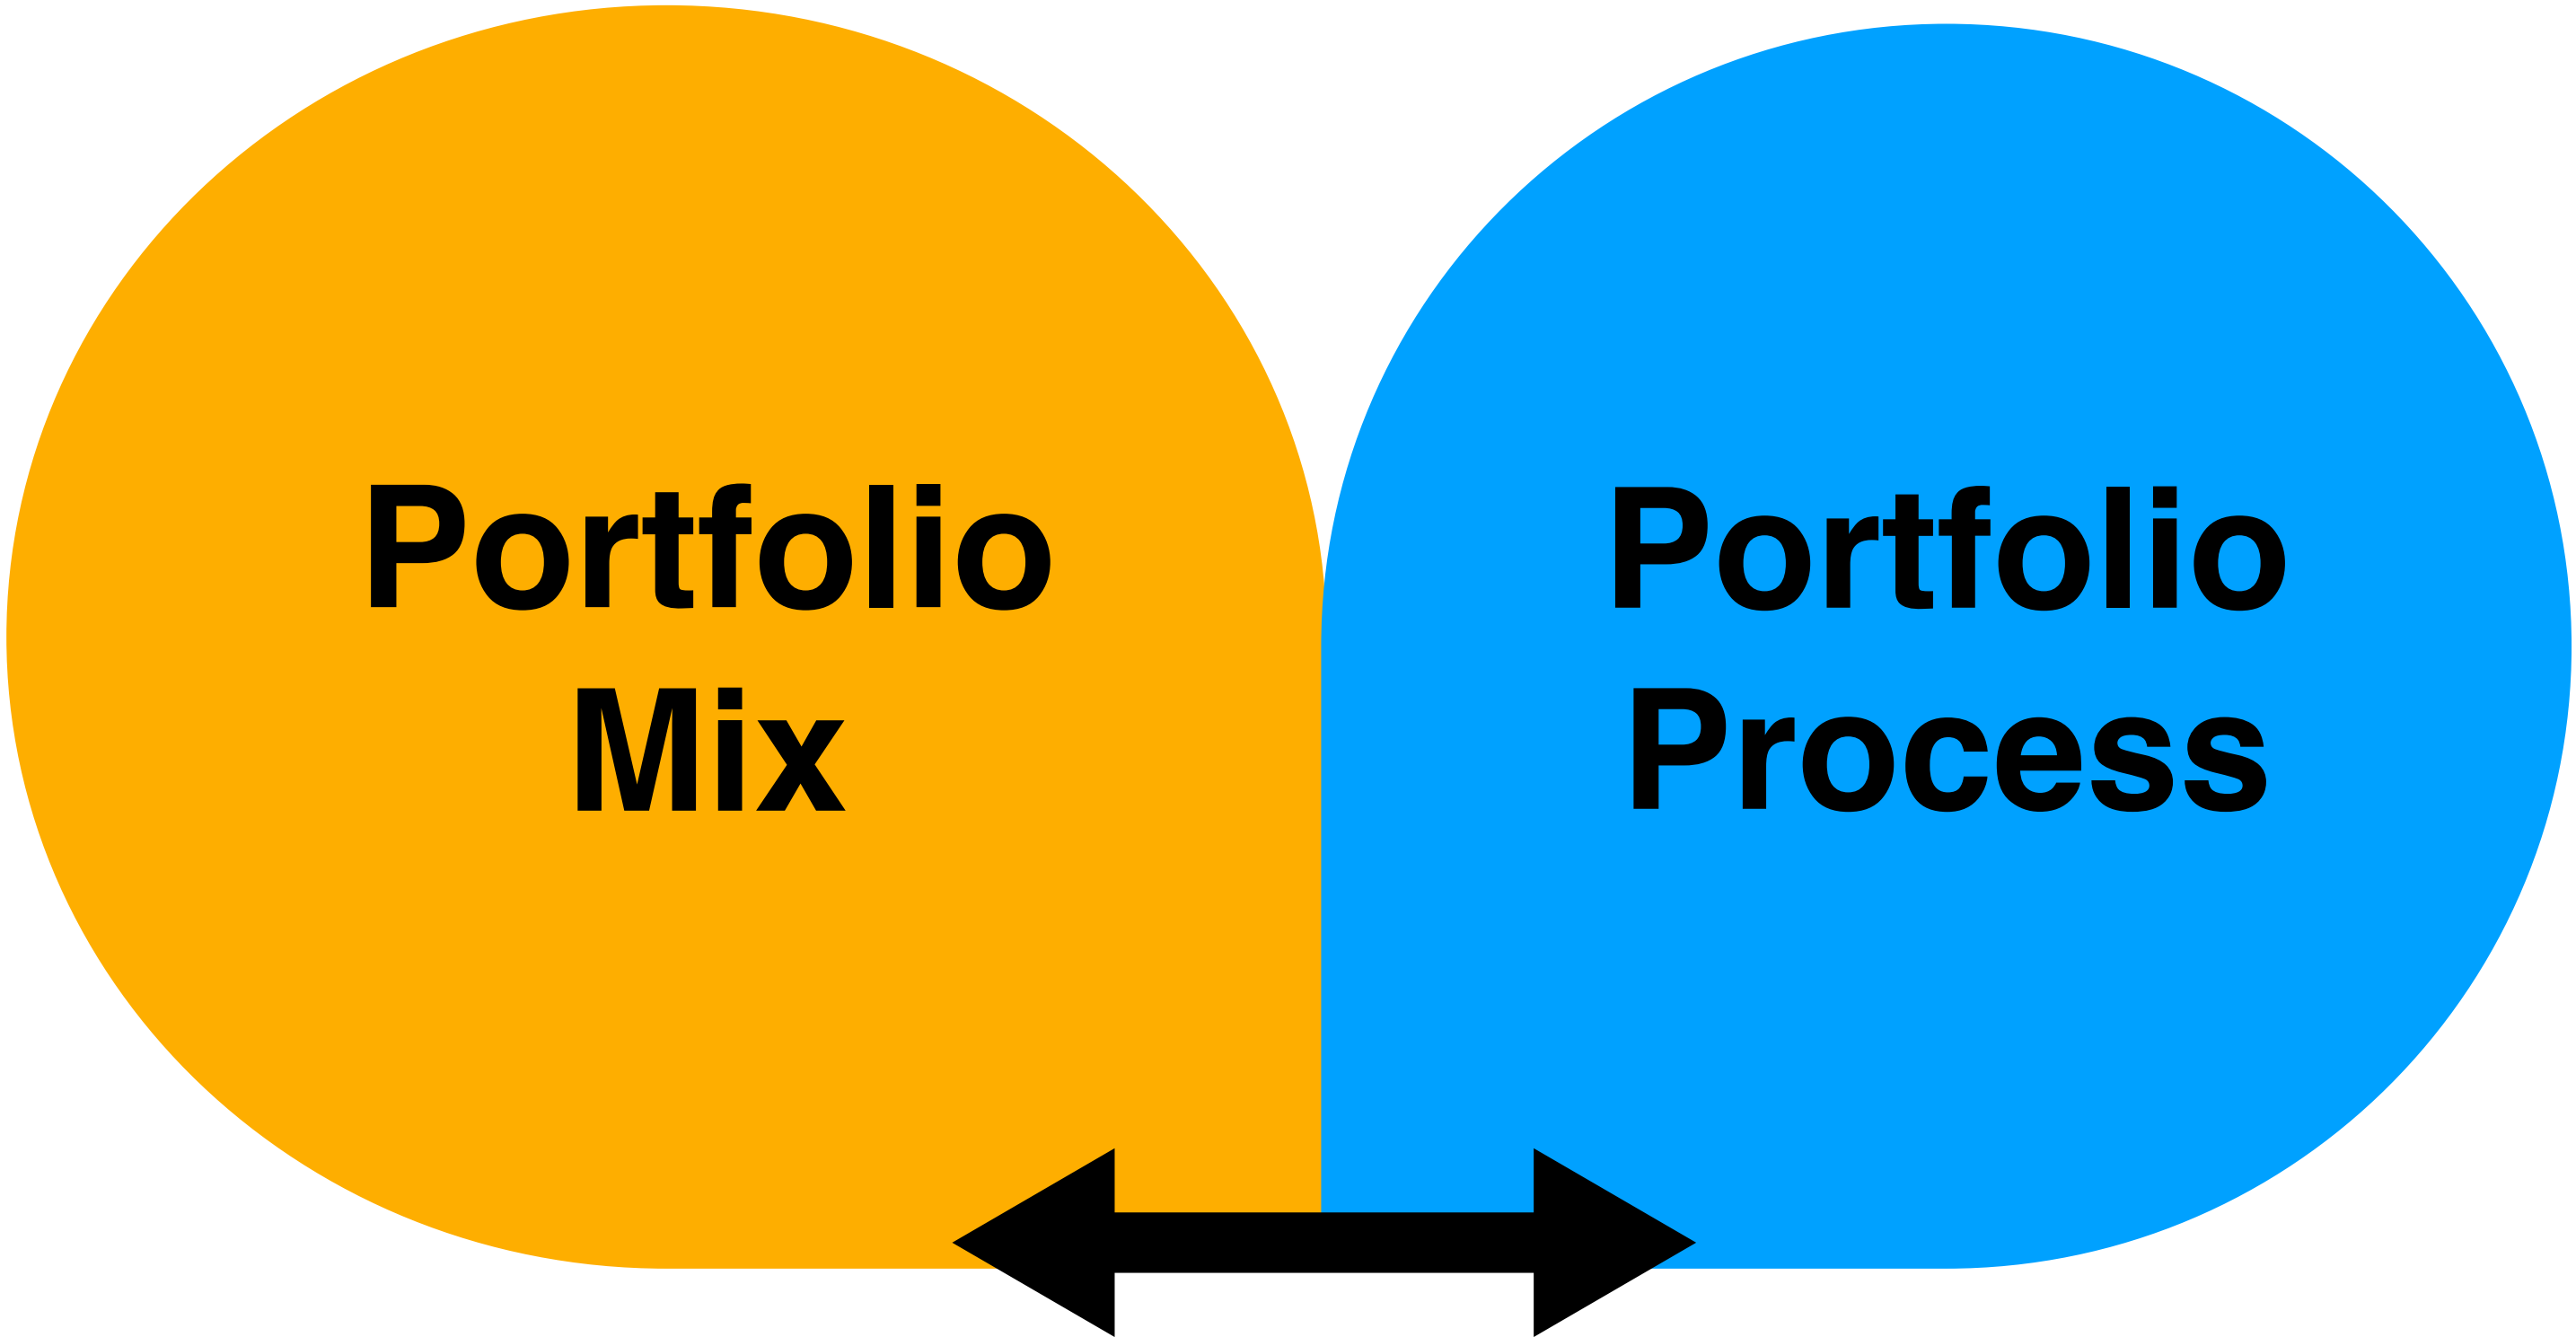

Why do they exist?

because of underlying context that shapes portfolio process and portfolio mix

How can we address these portfolio management challenges?

Most of the attention is given to portfolio mix

Acknowledging that portfolio process is a critical aspect of portfolio mix and performance

What is the process of building portfolios?

Process derived based on fieldwork, theory and observations:

7 years

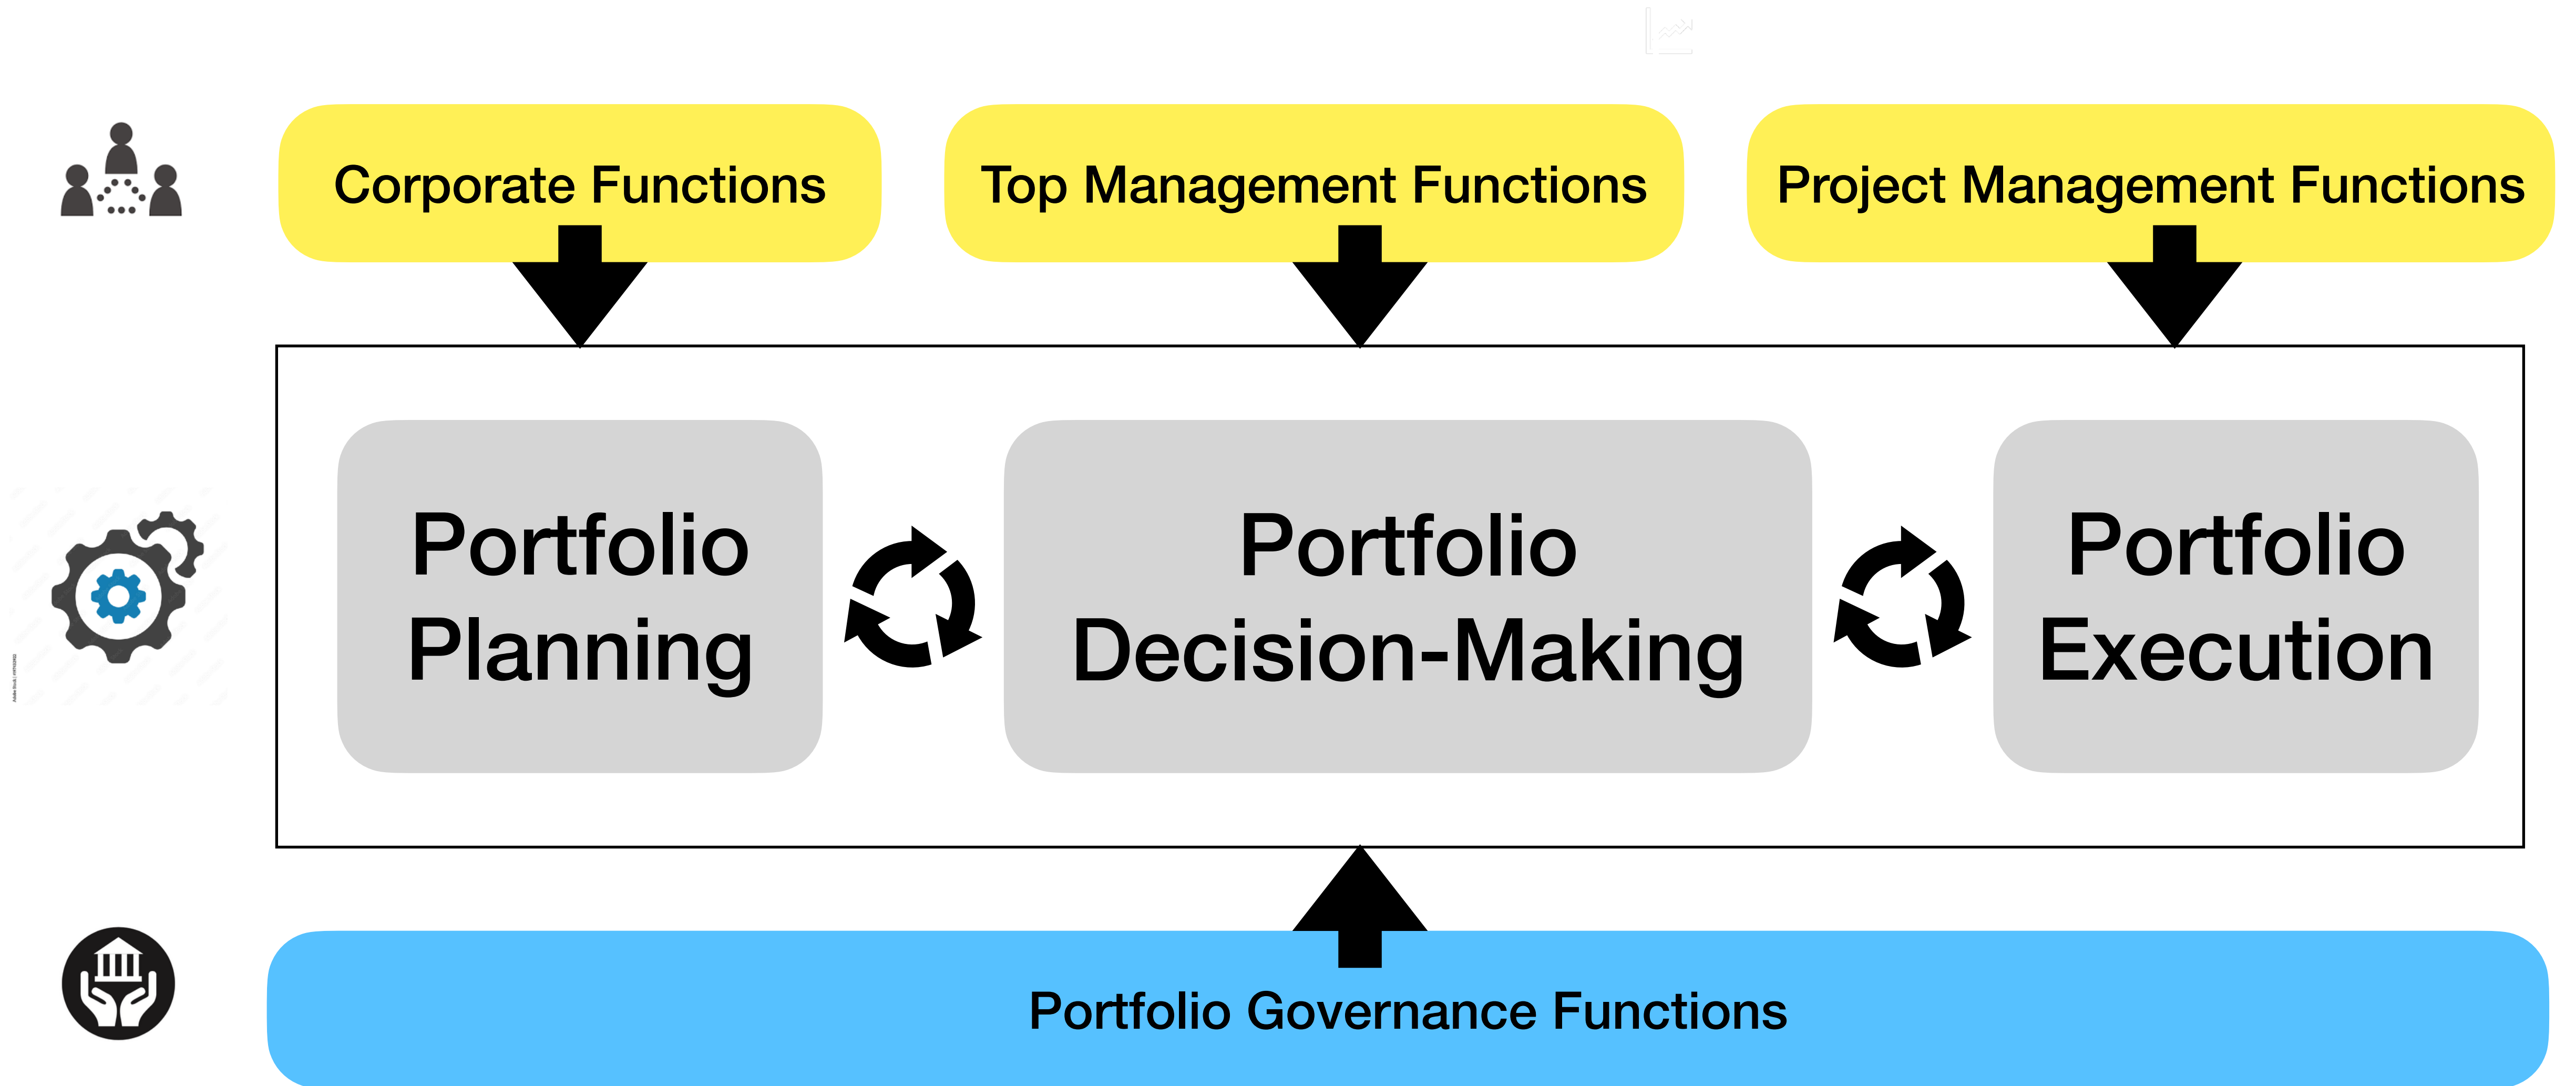

45 Technology Intensive Firms Across Industries

100 Portfolio Management Stakeholders & CXOs

\$ - \$\$ Billion Portfolio Value

What is the process of building portfolios?

What is the process of building portfolios?

STRATEGIC <small>(represents 49% of the weighting)</small>	FINANCIAL <small>(represents 31% of the weighting)</small>	RISKINESS <small>(represents 10% of the weighting)</small>
Strategic Objective #1 Weighting = 22%	Financial Criterion #1 Weighting = 16%	Risk Factor #1 Weighting = 5%
Strategic Objective #2 Weighting = 18%	Financial Criterion #2 Weighting = 8%	Risk Factor #2 Weighting = 3%
Strategic Objective #3 Weighting = 9%	Financial Criterion #3 Weighting = 7%	Risk Factor #3 Weighting = 2%

EXAMPLE

Portfolio Planning

Portfolio
Decision-Making

Portfolio Execution

Portfolio Process of Industrial Automation Equipment Firm

Before:

Project decisions were taken by high-level comparison between projects

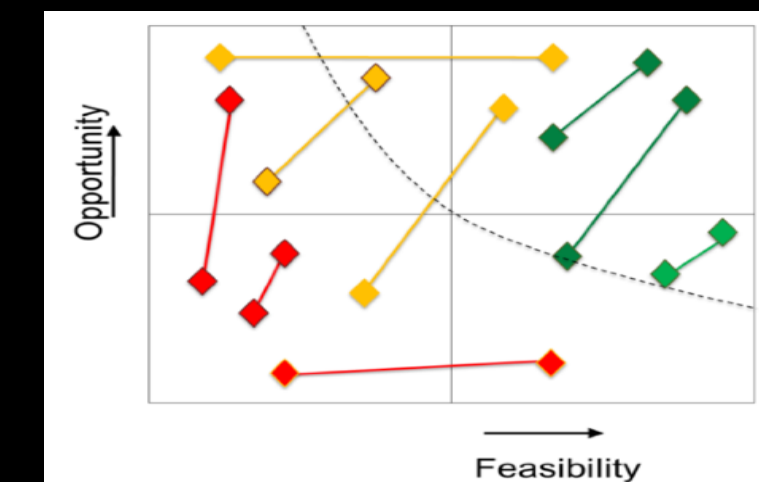

Product,
Senior
Management

Portfolio
Decisions

After:

Project decisions were taken by formal and structured project comparison

No formal prioritisation criteria for assessing and comparing projects

Unstructured & subjective decision-making process

Unclear priorities leading to project delays and lower portfolio value

STRATEGIC <small>(represents 49% of the weighting)</small>	FINANCIAL <small>(represents 31% of the weighting)</small>	RISKINESS <small>(represents 10% of the weighting)</small>
Strategic Objective #1 Weighting = 22%	Financial Criterion #1 Weighting = 16%	Risk Factor #1 Weighting = 5%
Strategic Objective #2 Weighting = 18%	Financial Criterion #2 Weighting = 8%	Risk Factor #2 Weighting = 3%
Strategic Objective #3 Weighting = 9%	Financial Criterion #3 Weighting = 7%	Risk Factor #3 Weighting = 2%

EXAMPLE

Objective criteria and evidence based prioritisation

Structured and stakeholder aligned decision-making

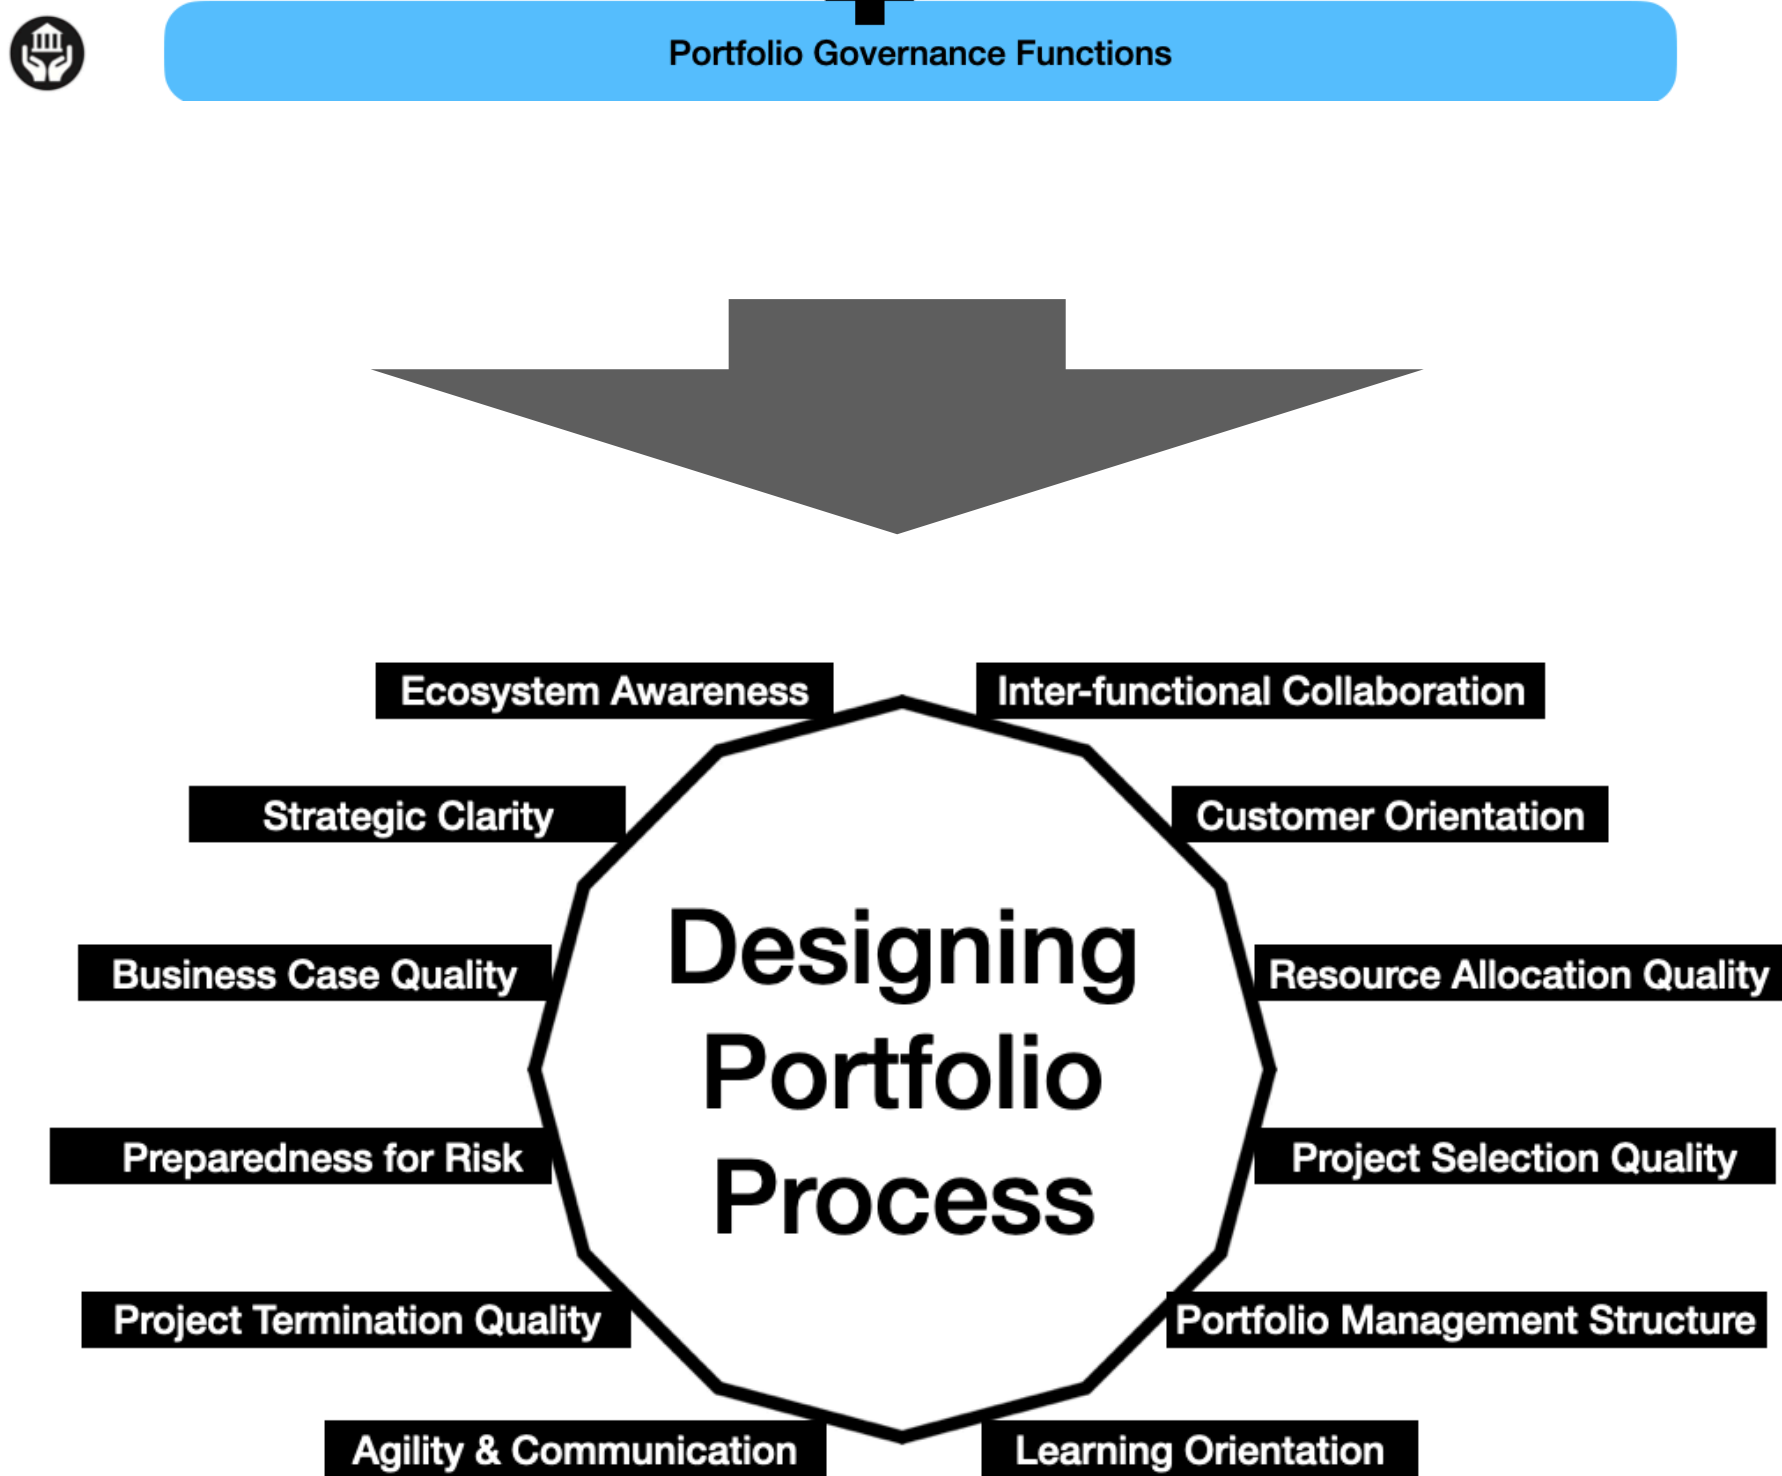

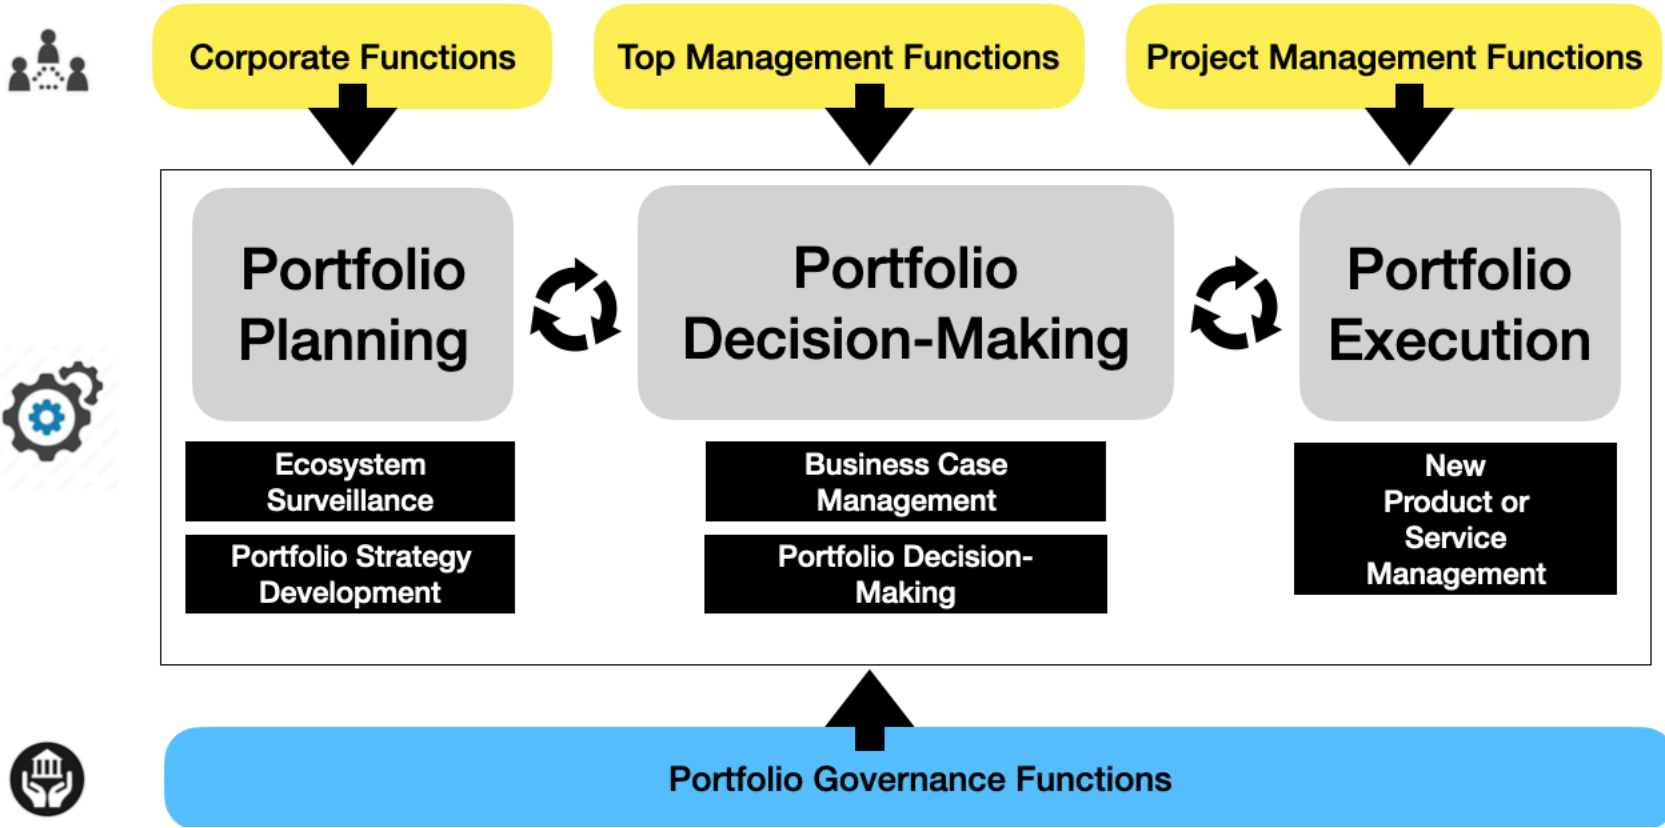

Better resource allocation quality and lower project delays

~~Poor project selection quality~~

~~Missing strategic alignment~~

~~Delayed project timelines~~

Configuration Tool for Portfolio Processes

UNIVERSITY OF CAMBRIDGE Assessment of Portfolio			UNIVERSITY OF CAMBRIDGE Assessment of Portfolio Management Practices				
RELEVANCE		IMPORTANCE	RELEVANCE	IMPORTANCE	CONSISTENCY	EXECUTION QUALITY	
Low	Medium	High	Low	Medium	High	High quality, as high as practically possible	
0-3	4-7	8-10	0-3	4-7	8-10	0% 100%	
A. Ecosystem Awareness			H. Project Selection Quality				
Invest resources for market and customer investigations (e.g. funds, personnel)	YES	7	Assess individual projects from multi-functional perspectives (e.g. technical, strategic criteria etc.)	YES	7	60	60
Identify market and social trends across different geographical regions	YES	5	Use assessment methods and visuals which reveal merits/de-merits of individual projects and portfolio compositions	YES	7	50	60
Investigate new technologies and review Intellectual Property (internally and externally)	YES	8	Perform portfolio checks by categorizing projects from different perspectives (e.g. related to budget, balance, resources)	YES	7	50	50
Scan for opportunities for Merger & Acquisition (e.g. set-up incubators)	NO (YES)	3	Understand opportunity cost of projects that are not selected and discuss alternatives (if needed)	YES (1 NO)	6	30	40
Gather competition insights from commercial ends (e.g. from sales, suppliers, distributors)	YES	6	Get inputs from top management for final prioritization of projects and resource authorization	YES	8	50	60
Monitor existing products in market and identify life cycle management requirements	YES	7	Use stage-gate reviews to ensure validity of business cases over time	YES	9	60	60
Analyze & prioritize micro/macro trends to identify business requirements	YES (1 NO)	5	Identify warning signals for 'pet' projects	YES	7	40	40
B. Inter-functional Collaboration			I. Project Termination Quality				
Govern portfolio(s) from different functional perspectives- R&D, Finance, Marketing etc.	YES (1 NO)	5	Identify internal and external warning signals leading to project termination	YES	7	50	50
Functional and regional experts together conduct business reviews	YES	8	Use measures to avoid escalation of commitment in projects (e.g. forward looking attitude, back-up projects in case of termination)	YES	6	40	30
Corporate functions share project and portfolio level information with each other	YES	7	Involve top management team in termination decisions and communicate the grounds of project termination	YES (2 NO)	8	50	60
Corporate functions together create, maintain, and own technology and business roadmaps	YES	8	Use a set of criteria for project termination (e.g. fundamental limits of technology, strategically irrelevant)	YES	8	30	40
C. Strategic Clarity			J. Learning Orientation				
Use strategic buckets to guide overall resource allocation	YES	9	Enact and improve portfolio management process with support from top management team	YES	7	60	50
Identify strategic targets based on long term roadmaps (e.g. new product introduction rate, revenue growth)	YES	8	Audit portfolio management process and introduce changes while considering organizational readiness levels	YES	7	50	50
Set direction and priorities for developing technology platforms and capabilities	YES	9	Capture learnings at stage-gates & create formal learning reports for future references	YES	8	40	40
Translate business strategy into new product ideas and plans	YES (1 NO)	7	K. Portfolio Management Structure & Design				
Use strategy and roadmaps to define new product assessment criteria	YES	7	Portfolio management team or unit (if exists) provide support to business lines and project managers	YES	7	50	50
Fill strategic gaps in portfolio(s) by identifying new project opportunities across different organizational levels	YES	6	Portfolio management process performs the function of balancing demand vs supply of resources	YES (1 NO)	6	40	50
D. Customer Orientation			L. Agility				
Understand customer roadmaps and identify value addition opportunities or unmet needs	YES (1 NO)	7	Update portfolio strategy, roadmaps, business cases	YES	8	60	70
Maintain dialogues with customers from early stages of product/technology development	YES (1 NO)	7	Prioritize projects and resource allocations with changes in internal and external environment (e.g. change in strategic focus)	YES	9	60	60
Gather customer feedback on short & long term product plans by doing prototyping or trials using new technologies (e.g. Virtual Reality)	YES (1 NO)	7	Communicate project and portfolio updates to top management team	YES	9	50	60
E. Business Case Management Quality			G. Preparedness for Risk				
Do due-diligence to gather evidence behind assumptions and numbers in business cases	YES (1 NO)	6	Identify and manage project level risks (e.g. market, technology, delivery)	YES (2 NO)	7	7	40
Ensure accountability & feasibility of business cases from functional perspectives (e.g. by creating functional approvals points in the cases)	YES	7	Identify and manage portfolio level risks (e.g. over-budget, balance between products' time to market)	YES	7	7	40
Get the information from the business cases that is required for portfolio decision-making (e.g. NPV, strategic impact)	YES	8	Leave slack resources or capacity to handle contingencies	YES	8	8	40
Generate visuals & insights/recommendations based on business case assessment as needed by top management for decision-making	YES	8	F. Resource Allocation Quality				
Identify issues while monitoring progress of business cases (e.g. unmet objectives, low sales)	YES	7	Get operational clarity (e.g. resource availability) at project as well as portfolio levels	YES	8	60	70
F. Resource Allocation Quality			L. Agility				
Manage resource allocation requests and conflicts (e.g. by using a resource management process)	YES (1 NO)	7	Formally manage portfolio data using IT tools and applications	YES (1 NO)	6	50	50
Use explicit basis to prioritize or negotiate resource allocations (e.g. roadmaps/criteria)	YES	9	Use learning from previous projects during portfolio decision-making events	YES	7	60	50
Create resource allocation plans and assess implications of resource commitments	YES (1 NO)	7	Use a guide that describes portfolio management activities, roles and responsibilities, project templates etc.	YES	8	40	50
G. Preparedness for Risk			L. Agility				
Identify and manage project level risks (e.g. market, technology, delivery)	YES (2 NO)	7	Synchronize portfolio decision-making or reviews with product and industry characteristics (e.g. high-tech product need frequent reviews)	YES (1 NO)	6	30	30
Identify and manage portfolio level risks (e.g. over-budget, balance between products' time to market)	YES	7	L. Agility				
Leave slack resources or capacity to handle contingencies	YES	8	Update portfolio strategy, roadmaps, business cases	YES	8	60	70
H. Project Selection Quality			L. Agility				
Assess individual projects from multi-functional perspectives (e.g. technical, strategic criteria etc.)	YES	7	Prioritize projects and resource allocations with changes in internal and external environment (e.g. change in strategic focus)	YES	9	60	60
Use assessment methods and visuals which reveal merits/de-merits of individual projects and portfolio compositions	YES	7	Communicate project and portfolio updates to top management team	YES	9	50	60
Perform portfolio checks by categorizing projects from different perspectives (e.g. related to budget, balance, resources)	YES	7	Handle urgencies or new opportunities at project and portfolio levels (e.g. by having extraordinary portfolio decision-making meetings)	YES	9	40	40
Understand opportunity cost of projects that are not selected and discuss alternatives (if needed)	YES (1 NO)	6	Assess sensitivities or implications of changes in portfolio, resource allocations etc.	YES (1 NO)	7	40	40
Get inputs from top management for final prioritization of projects and resource authorization	YES	8	L. Agility				
Use stage-gate reviews to ensure validity of business cases over time	YES	9	Update portfolio strategy, roadmaps, business cases	YES	8	60	70
Identify warning signals for 'pet' projects	YES	7	Prioritize projects and resource allocations with changes in internal and external environment (e.g. change in strategic focus)	YES	9	60	60
Communicate portfolio decisions with further guidance to project applicants	YES	7	Communicate project and portfolio updates to top management team	YES	9	50	60
I. Project Termination Quality			L. Agility				
Identify internal and external warning signals leading to project termination	YES	7	Handle urgencies or new opportunities at project and portfolio levels (e.g. by having extraordinary portfolio decision-making meetings)	YES	9	40	40
Use measures to avoid escalation of commitment in projects (e.g. forward looking attitude, back-up projects in case of termination)	YES	6	Assess sensitivities or implications of changes in portfolio, resource allocations etc.	YES (1 NO)	7	40	40
Involve top management team in termination decisions and communicate the grounds of project termination	YES (2 NO)	8	L. Agility				
Use a set of criteria for project termination (e.g. fundamental limits of technology, strategically irrelevant)	YES	8	Update portfolio strategy, roadmaps, business cases	YES	8	60	70
Put projects on hold when warranted and assess implications of termination	YES	8	Prioritize projects and resource allocations with changes in internal and external environment (e.g. change in strategic focus)	YES	9	60	60
Terminate 'bad' projects in early phases of execution (e.g. by using a robust stage-gate process)	YES	8	Communicate project and portfolio updates to top management team	YES	9	50	60
J. Learning Orientation			L. Agility				
Enact and improve portfolio management process with support from top management team	YES	7	Handle urgencies or new opportunities at project and portfolio levels (e.g. by having extraordinary portfolio decision-making meetings)	YES	9	40	40
Audit portfolio management process and introduce changes while considering organizational readiness levels	YES	7	Assess sensitivities or implications of changes in portfolio, resource allocations etc.	YES (1 NO)	7	40	40
Capture learnings at stage-gates & create formal learning reports for future references	YES	8	L. Agility				
K. Portfolio Management Structure & Design			L. Agility				
Portfolio management team or unit (if exists) provide support to business lines and project managers	YES	7	Update portfolio strategy, roadmaps, business cases	YES	8	60	70
Portfolio management process performs the function of balancing demand vs supply of resources	YES (1 NO)	6	Prioritize projects and resource allocations with changes in internal and external environment (e.g. change in strategic focus)	YES	9	60	60
Portfolio management process performs the function of change management (e.g. resource changes)	YES (2 NO)	4	Communicate project and portfolio updates to top management team	YES	9	50	60
Portfolio management process manage transition of ideas to businesses holistically	YES (1 NO)	5	Handle urgencies or new opportunities at project and portfolio levels (e.g. by having extraordinary portfolio decision-making meetings)	YES	9	40	40
Take portfolio decisions in line with required leadership in market and innovation	YES	6	Assess sensitivities or implications of changes in portfolio, resource allocations etc.	YES (1 NO)	7	40	40
Use different stage-gate processes according to projects types	YES	7	L. Agility				
Formally manage portfolio data using IT tools and applications	YES (1 NO)	6	Update portfolio strategy, roadmaps, business cases	YES	8	60	70
Use learning from previous projects during portfolio decision-making events	YES	7	Prioritize projects and resource allocations with changes in internal and external environment (e.g. change in strategic focus)	YES	9	60	60
Use a guide that describes portfolio management activities, roles and responsibilities, project templates etc.	YES	8	Communicate project and portfolio updates to top management team	YES	9	50	60
Synchronize portfolio decision-making or reviews with product and industry characteristics (e.g. high-tech product need frequent reviews)	YES (1 NO)	6	Handle urgencies or new opportunities at project and portfolio levels (e.g. by having extraordinary portfolio decision-making meetings)	YES	9	40	40
L. Agility			L. Agility				
Update portfolio strategy, roadmaps, business cases	YES	8	Assess sensitivities or implications of changes in portfolio, resource allocations etc.	YES (1 NO)	7	40	40
Prioritize projects and resource allocations with changes in internal and external environment (e.g. change in strategic focus)	YES	9	L. Agility				
Communicate project and portfolio updates to top management team	YES	9	Update portfolio strategy, roadmaps, business cases	YES	8	60	70
Handle urgencies or new opportunities at project and portfolio levels (e.g. by having extraordinary portfolio decision-making meetings)	YES	9	Prioritize projects and resource allocations with changes in internal and external environment (e.g. change in strategic focus)	YES	9	60	60
Assess sensitivities or implications of changes in portfolio, resource allocations etc.	YES (1 NO)	7	Communicate project and portfolio updates to top management team	YES	9	50	60
