

# **Borrower Characteristics and Credit Supply Expansion in the U.S. Residential Mortgage Market, Evidence from 2010 to 2015**

---

Raghav Saraogi    Advisor: Arpit Gupta

NYU Stern Honors Thesis Presentation, May 4, 2018

The Landscape: What are borrowers like in this period?

Greater levels of income result in higher approval rates, all else equal.

Income is more closely associate with origination measures over the six-year period.

Income growth is leads to higher approval rates, causal estimates.

Conclusion.

The Landscape: What are borrowers like in this period?

Greater levels of income result in higher approval rates, all else equal.

Income is more closely associate with origination measures over the six-year period.

Income growth is leads to higher approval rates, causal estimates.

Conclusion.

# Higher Approval Rates and Demand

Source: HMDA

## What are borrowers in 2015 like?

Have a higher income.

Demand marginally more debt for given income level.

Have slightly lower credit scores.

Otherwise have largely similar characteristics as in 2010.

## What are borrowers in 2015 like?

Have a higher income.

Demand marginally more debt for given income level.

Have slightly lower credit scores.

Otherwise have largely similar characteristics as in 2010.

## What are borrowers in 2015 like?

Have a higher income.

Demand marginally more debt for given income level.

Have slightly lower credit scores.

Otherwise have largely similar characteristics as in 2010.

## What are borrowers in 2015 like?

Have a higher income.

Demand marginally more debt for given income level.

Have slightly lower credit scores.

Otherwise have largely similar characteristics as in 2010.

## Tract-level panel setup

$$Q_{i,t} = \beta \ln(y)_{i,t,j} + \gamma CLTV_{i,t} + \rho FICO_{i,t} + \phi DTI_{i,t} + FE_t + FE_{county} + \epsilon_{i,t} \quad (1)$$

Where:

- $Q$ : Approval rate
- $y_j$ : Median Income - IRS or Applicant Income
- $CLTV$ : Median Combined Loan-to-Value ratio
- $FICO$ : Median FICO (Credit) Score
- $DTI$ : Median Debt-to-Income Ratio (Percentage Points)
- $FE_t$ : Year Fixed Effects
- $FE_{county}$ : County Fixed Effects

# The impact of income growth within a county and ZIP Code

Column 1:

$$Q_i = \beta \text{Ln}(y_i) + \gamma \text{FICO} + FE_{\text{county}} + \epsilon_i \quad (2)$$

Column 2:

$$Q_i = \beta \text{Ln}(y_i) + FE_{\text{FICOquintile}} + \epsilon_i \quad (3)$$

# The Bartik Instrument

Instrument median taxable income across counties using a Bartik Instrument.

$$\tilde{y}_{it} = Z'_{l,t} G_t \quad (4)$$

where

$Z'_{i,l,t}$ : Employment share of industry  $i$  in county  $l$  at time  $t-1$

$G_{i,t}$ : Growth in number of payroll employees in industry  $i$  over period  $t-1$  to  $t$ .

# Bartik Instrument Results

	(1)	(2)	(3)
Ln IRS Income	3.464*** (0.070)	12.107*** (0.468)	12.107*** (0.468)
FICO	0.409*** (0.011)		
County Fixed effects?	Yes	No	No
FICO Score Quintile Fixed effects?	Yes	Yes	Yes
Year Fixed effects?	No	No	Yes
N	18,449	18,449	18,449
R <sup>2</sup>	0.193	0.128	0.128
Adjusted R <sup>2</sup>	0.193	0.128	0.128
F Statistic	2,199.058*** (df = 2; 18441)	-6,694.030 (df = 1; 18442)	-6,694.030 (df = 1; 18442)

Notes:

\*\*\*Significant at the 1 percent level.

\*\*Significant at the 5 percent level.

\*Significant at the 10 percent level.

**Within a county:** 10% Increase in Income  $\rightarrow$  0.33% increase in approval rate.

**Within a FICO Quintile:** 10% Increase in Income  $\rightarrow$  1.15% increase in approval rate.
