This course is designed to build and strengthen your ability to correctly interpret financial statements and their accompanying disclosures and use them to assess a company's value. Emphasis will be placed on the interpretability and understandability of financial and business communications. This includes studying the major corporate reporting mechanisms including: the Annual Report, Form 10K, Form 8K and Form 10Q. We will spend some time and discussion on interpreting and understanding comparison of financial information and disclosure within and across industries. Throughout the course we will discuss key financial statement analysis tools including: ratio analysis, working capital, asset management, return on assets, return on equity, the impact of debt on the capital structure. In the second part of the course, we will move to valuation models commonly used.

Grading Information for Stern Core Courses

At NYU Stern, we strive to create courses that challenge students intellectually and that meet the Stern standards of academic excellence. In core classes of less than 25 students, the instructor is at liberty to give whatever grades they think the students deserve, while maintaining rigorous academic standards.

Grading Information for Stern Elective Courses

At NYU Stern, we strive to create courses that challenge students intellectually and that meet the Stern standards of academic excellence. To ensure fairness and clarity of grading, the Stern faculty have agreed that for elective courses the individual instructor or department is responsible for determining reasonable grading guidelines.
