**Text** – Financial Reporting and Analysis by Revsine, Collins, Johnson and Mittelstaedt, *Fifth Edition*.

**Course Content:** This course concentrates on issues that affect the nature and quality of financial reporting. Selected topics introduced previously are developed in more depth from a management perspective. Additional topics are also developed. Accounting choices and financial instruments are major themes across many of the topics. The primary focus is on the impacts of choices, estimation on corporate reporting and problem solving.

A few course-related questions:

- What happened to accounting and control at **WorldCom**?
- What are the revenue accounting issues associated with the **HP-Autonomy** debacle?
- How do joint products (e.g. sale with service support) contribute to revenues and expenses?
- When can inventory be reported at its sales value rather than its accumulated cost?
- What do probabilities have to do with a company's financial statements?
- How does factoring improve a company's **cash flow** and balance sheet?
- How does a company's intent affect its reporting of investments?
- Can an asset have a negative salvage value?
- What is the impact of lease reporting on operating **cash flows**?
- Is estimation of off-balance sheet liabilities meaningful?
- Why do profitable companies have tax valuation allowances (for losses) and how do they deal with uncertain tax positions?
- How do companies like **Google** reduce their tax obligations?
- Can pension estimates be manipulated and what is the impact on the financial statements?
- How has **IBM** changed its pension policies?
- What are the financial and tax impacts for the company and its investors of paying management in options rather than cash?

**Attendance:** Attendance and completion of homework are essential. You should **attend every class** to get a good understanding of the course materials.

**Exams:** There are two midterms and a final. Exams are open book and open notes. There are **no make-up exams**. If you cannot take an exam when scheduled you are expected to take it **early**. The exams will be given on the stated dates. The topics may change if the course falls behind schedule.

**Quizzes:** There will be several 15 minute quizzes. Quizzes are open book and open notes. Quizzes **cannot** be rescheduled. There are **no make-up quizzes**. Quizzes are scheduled for the first class following a given chapter and will focus on that chapter. The dates of the quizzes may change if our experience deviates from this schedule. Quizzes are 10% of the grade, but can become up to 20% of the grade if your quiz average exceeds your score on your poorest exam. (The poorest exam becomes 16% of your grade).

**Cases:** Handing in a short (½ - 1 page) **TYPED** case writeup is **required**. One paragraph should describe the issues and considerations associated with the case. A second and/or a third paragraph should include your opinions about the issues and 'real world' issues that might further impact your opinion. See the grade guide below.

**Suggested exercises:** These exercises focus on the primary topics in the course and may help you prepare for the quizzes. They do **NOT** have to be handed in. Try to work the exercises in your own way and, if you are stuck, try to understand the answer that is on Blackboard or ask questions in class.

**Extra credit - classroom performance:** Readings and classroom exercises should be reviewed before class. **You are expected to be able to contribute to discussions about the exercises as well as other classroom discussions.** Positive contributions include questions and well-intended responses irrespective of their accuracy.

**Support materials:** Visit NYU Classes early and often. It has announcements, class notes, slide shows, spreadsheets, sample exams and miscellaneous articles. Many of the relevant materials will be provided as handouts.

**Default policies:** Policies not outlined here will be covered by the Stern default policies document attached to this syllabus.

**You are expected to follow the undergraduate code of conduct and the graduate honor code throughout the semester.**
